Thermo Scientific 2D Storage Kits

2D Storage Starter Kits

SAVE R8000

Complete Storage Solution

Take your sample processing, tracking and storage to the next level with Thermo Scientific Matrix 2D Storage. Tubes. This starter kit is the perfect first step for researchers who are trying to move from regular cryogenic tube storage to ANSI, format processing with 2D barcode tracking. Anyone who is tired of labeling cryogenic tubes and hoping they can read the labels after months in storage – give this complete 2D tracking kit a try and enjoy the wonders of a permanent labeling solution. For a low price, you get a handheld decapper, a VisionMate Wireless Barcode Reader, and 5 cases of tubes to begin tracking and capping samples like a pro!
